Campbell & Cochrane Updates

*Cochrane*
The groups website can also be accessed from [http://methods.cochrane.org/economics/](http://methods.cochrane.org/economics/). The previous web address of www.c-cemg.org needs to be repointed to this address

A short article describing the work of the group in the last year was submitted to Cochrane Methods

Research methods
HE 2015-16.docx

A short commentary was also submitted to Cochrane Methods on the paper

Handbook - A draft of the revised chapter has been prepared and currently with LV

A new Research assistant has been appointed – expected to start in August. The work programme is to be agreed but anticipated to include:

- Revision of training materials
- Revision of online module
- Support to handbook revisions
- Piloting of tools

Grants
European Association of Urologist (EAU) Guidelines Project: Harmonising care across European Union & beyond. Proposed EU 2020 bid. Scope for an economic workpackage on: “WP4: Can a generalisable model of cost effectiveness be created which encompasses the diversity of urological conditions and EAU healthcare systems?” Partners in other European countries are being sought plus there is scope for more formal evaluation”
Dev’t of Horizon 2020 bid on role and diagnostic and prognostic value of PET by the Cochrane Cancer Allicance. Focus on 3 European countries and requirement for an economic component.

ToR Cochrane Cancer Alliance 2016
