

Payers of Health Services/Purchasers Stakeholder Group

Lorenzo Moja
Behrang Kianzad

Key Issue 1:

How should payers be involved?

- Defining costs
- Defining budget availability
- Defining feasibility of health interventions
- Provide binding remarks that support the definition of the target cohort of patients receiving the intervention.

Issue 2:

- In guideline development, accountability of Payers of Health Services is still limited,
- The legitimacy of involving them in decision-making process might be challenged

Poll 1

The most important role for Payers of Health Services are those related to defining costs, budget availability, and feasibility of health interventions as it relates to the PICO formulation (Topic 8)

- a) strongly agree
- b) agree
- c) disagree
- d) strongly disagree
