

# **Initial Thoughts from Providers Stakeholder Group**

Imad Bouaki, Comfort Ekanem  
and Michael Saginur

February 12, 2021

# **Issue 1: The key role of the provider is in defining the context for the evidence for clinical decision-making**

Step 11: Summarizing the evidence

Step 14: Writing recommendations

## **Issue 2: Providers should have a decision-making role for steps related to PICO and practicality/relevance of the recommendations**

Step 8: decisions around PICO question generation

Step 9: deciding on the relative importance of different outcomes

The Providers group to:

- a. Recommend on the adaptation of consensus development method/guidelines by the group on patients outcomes.
  
  - b. Prepare on active dissemination on plan with various approaches to enhance the adaptation/adoption of the guidelines (e. g. make guidelines available on line, develop formal relationships with those in health system).
2. Providers group to collect feedback of evaluations from users to identify how to improve the intrinsic Implementability of the recommendations in subsequent version of the guidelines.

# Poll

1. Providers should have a decision-making role related to PICO formulation(Topic 8)
2. Providers should have a decision-making role in addressing practicality/relevance of the recommendations (Topic 16).
