MuSE Guidelines Project Updates

MuSE Interviews - THANK YOU!

Thank you to everyone who responded to and/or shared our request to participate in interviews! With your support, we completed 42 interviews that will be incredibly helpful for developing our draft guidance for stakeholder engagement in guideline development.

We're so excited that our work has been shared internationally, with co-leads, survey and interview respondents from 30 different countries around the world. A map illustrating them can be found below.

MuSE Guideline Reviews

In 2022, we published 3 protocols for reviews related to stakeholder engagement in guideline development. These reviews are now in their final revisions and will be submitted to Campbell in the next weeks. The protocol for these reviews can be found at the end of the newsletter (p.5).

MuSE Systematic Reviews - New Project Updates

MuSE - ES Project

We have submitted the protocol for the MuSE – ES project and hope to see it published within the next few months. Stay tuned!

Review Series

We are getting ready to start on the series of reviews to inform our MuSE-ES project. We are inviting all members of the MuSE Consortium to join the working groups for these reviews. The reviews are summarized below.

You can sign up to participate [here!](#)

Review Topic	Type of review	Aim	Studies eligible
Stakeholder engagement methods	Scoping review	To summarize how stakeholders have been involved in evidence synthesis	Papers reporting on methods used for engaging stakeholders in evidence synthesis.
Barriers and facilitators to stakeholder engagement	Qualitative evidence synthesis	To synthesize the barriers and facilitators to stakeholder engagement in evidence synthesis	Papers reporting on barriers and/or facilitators for engaging with stakeholders.
Impacts of stakeholder engagement	Systematic review	To synthesize the impacts of stakeholder engagement on the evidence synthesis process, the product, its uptake and on the stakeholders involved.	Empirical evaluations (quantitative or qualitative) of the impacts of stakeholder engagement in evidence synthesis.
Conflicts of interest	Systematic review	To synthesize the literature on managing conflicts of interest related to stakeholder engagement.	Studies describing issues related to COI in evidence synthesis and methods for their management.

Help us decide on new Terminology!

MuSE aims to engage in and produce work that is relevant globally.

The use of the term 'stakeholder' is problematic for some populations and we would therefore like to replace it. We used the term to refer to an individual or group with a vested interest in the research/guideline/review question, health concern, or topic.

Please help us determine a suitable replacement for rebranding and future work by participating in a survey! You can pick a replacement word from the list provided or offer recommendations for ones not listed.

You can access the survey [here!](#)

Upcoming Presentations

We plan to submit abstracts for the MuSE Guidelines and MuSE Evidence Synthesis work to the following conferences:

- [Cochrane Colloquium 2023](#): 4-6 September (London, UK)
- [GIN 2023](#): 19-22 September (Glasgow, UK)
- [What Works Global Summit 2023](#): 18-20 October (Ottawa, Canada)

The latest presentation for the 2023 Campbell Webinar Series has been led by

Olivia Magwood

A recording of the event can be found [here!](#) While a copy of the presentation can be found [here!](#)

A poster for a Campbell Webinar Series event. The text on the poster includes: 'WILEY Campbell Webinar Series', 'Stakeholder engagement in evidence synthesis: Updates from a multi-stakeholder engagement consortium', 'Presenter: Olivia Magwood, Bruyère Research Institute, Canada', and 'Tuesday, 4 April 08.00 EST'. There is a portrait of Olivia Magwood on the right side and the Campbell Collaboration logo at the bottom right.

Multi-Stakeholder Engagement in Guideline Development and Implementation

When: Wednesday, April 12 2023, 12:00PM EST/ 11:00AM CT/ 9:00AM PT

This GIN-North America webinar will:

- Describe stakeholders for guideline development and improving engagement.
- Define engagement levels and describe how public members should be engaged throughout guideline development.
- Discuss the role of shared decision-making (SDM) in the implementation of guidelines in the clinical setting.
- Share tools that can be used to support SDM and patient-centered communication and discussions about guideline-based care.

Speakers: Maya Gerstein, DrPH, Marisha Palm, PhD, and Jennifer Pertkovic, PhD
