

Citation of Article:

Some elements of the basic Structure of the research priority setting exercise:

1. What is the objective of the research priority setting exercise?			
2. Does the article explain and rationalise the choice of selection of stakeholders to be involved in the priority setting exercise?			
3. Based on your knowledge of the topic, who do you think should be the stakeholder to address the question?			
Think and discuss any differences in the answer to question 2 and 3			
Step in the priority setting process	Were the stakeholders involved? (Yes/No). If yes, rate the level of engagement (1,2,3,4,5) 1 no involvement, 5 partnerships and co-design	If you designed the project, would you have involved the stakeholder in the step? If yes, what level of involvement would you have planned? (1-5)	Are your answers to the 2 nd and 3 rd column similar or different?
Designing the priority setting exercise			
Identifying research questions/issues			
Defining criteria for ranking the priorities			
Collecting background and contextual information to inform the decision			
Ranking the research questions/issues			

Reaching final consensus on the prioritised topics			
Disseminating and implementing the final priorities to become research questions?
