Cochrane Methods
Prognosis

2021

Convenors: Karel Moons, Jill Hayden
Richard Riley, Katrina Williams
Coordinator: Anneke Damen

Highlight:
Launched a brand-new, interactive, online module introducing the Cochrane community to systematic review of prognosis studies

Research and development
- Developing guidance for using GRADE in systematic reviews of prognosis studies
- Developing a risk of bias tool for overall prognosis studies
- Developing guidance for reporting and quality assessment of prediction models developed using Machine Learning techniques (to create TRIPD-ML and PROBAST-ML)

Best practice and guidance
- Facilitated online courses on systematic reviews of prognosis studies for Cochrane authors
- Published many papers on reporting of and methods for primary and meta-prognosis studies, including guidance for sample size calculations for prediction model development and validation

Methods implementation
- Launched a brand-new, interactive, online module introducing the Cochrane community to systematic review of prognosis studies
- Provided feedback on Cochrane’s new Editorial Manager system
- Available to support and peer review Cochrane Reviews
