

2021

Convenors: Mariska Leeflang, Petra Macaskill, Yemisi Takwoingi

Highlight:

Launch of the first chapters of the major update of the *Cochrane Handbook for Systematic Reviews of Diagnostic Test Accuracy* (version 2) to be published by Wiley in 2022

Research and development

- Development of QUADAS-C, extension to QUADAS-2, for appraising the risk of bias of comparative accuracy studies included in test accuracy reviews
- Published PRISMA-DTA for abstracts and the explanation and elaboration paper for PRISMA-DTA

Best practice and guidance

- Launched chapter 4 from the new *Handbook* on understanding the designs of test accuracy studies
- Launched chapter 9 from the new *Handbook* on collecting data
- Launched chapter 10 from the new *Handbook* on understanding meta-analysis

Methods implementation

- Provide support to DTA review authors and Cochrane Review Groups by contributing expertise as needed
- Provided feedback on Cochrane's new Editorial Manager system
- Supporting the development of RevMan's DTA functionality
