# SUGGESTED Review Sheet of Meta-analyses and Systematic Reviews of Patient-Reported Outcomes

Reviewer Name	Reviewer Name:						
Citation							
Meta analysis	□ Yes	□ No	Systematic Review	□ Yes	□ No		

### Brief Description of Intervention(s) or Treatment(s) Being Evaluated in Meta-analysis/Systematic Review

Specify:	

#### 1. Description of literature search KEYWORDS

E.

Specify:	
Multiple electronic databases (list)	
Check of citations of eligible articles: $\Box$ Yes $\Box$	No
Contact with key informant: $\Box$ Yes $\Box$ No	
Search for abstracts of meetings: $\Box$ Yes $\Box$ No	
Contact with any sponsors of research: $\Box$ Yes $\Box$	No
Search for dissertations: $\Box$ Yes $\Box$ No	

#### 2. Description of data extraction process

Г

Specify the process for review of ab	stracts and for review of articles	
Multiple abstractors:  Yes	□ No	
Measure of agreement: □ Yes If Yes, what measure of agreement		

#### 3. How many studies were retrieved and retained?

- Abstracts Retrieved:
- Abstracts Retained
- Articles retrieved
- Articles retained

Other:

- Final articles retained:

#### 4. Was quality assessed?

□ Yes □ No

#### If YES, how and by whom

List criteria:

Multiple reviewers of quality?:  $\Box$  Yes  $\Box$  No

Measure of agreement on quality of article?:  Yes	No
If Yes, what measure of agreement was used	

Quality assessed using the following:

- -Existing standardized aggregated score
- Aggregated score created for this review
- -Disaggregated individual aquality items

If treatment studies, were the following used in quality review:

-Concealment:	Yes 🗆	No	
-Blinding:  □Yes	□ No		
-Loss to follow-up:	□Yes □	No	
5. Type of studies retriev	ed		
- Random	nized Contro	lled Trial	how many?
- Nonran	domised stud	ły	how many?

# 6. Did the authors provide a conceptual definition of what the instruments used in each article measured? For example, did they claim the instrument measured quality of life or provide a definition of the PRO used, such as functional status or physical function

 $\Box$  Yes  $\Box$  No for each article

What percentage of articles provided a "label" or definition of the concept being measured?

#### 7. Was the concept (such as QoL or physical function) measured in all studies deemed eligible for review?

 $\Box$  Yes  $\Box$ No

If No, give number of studies where the concept was measured out of the total:

#### References for all the articles included in the systematic review or meta analysis:

Specify:

#### 8. PRO Measure(s)

		Instrumen	t Validation	Ge	neric or
Instrument	Domain	Reference	e Included?	Sp	pecific?
		Yes	No	Generic	Specific
		Yes	No	Generic	Specific
		Yes	No	Generic	Specific
		Yes	No	Generic	Specific
		Yes	No	Generic	Specific
		Yes	No	Generic	Specific
		Yes	No	Generic	Specific

#### 9. Was the PRO considered as primary or secondary endpoint by the authors?

- □ Primary endpoint
- □ Secondary endpoint
- $\Box$  Not specified

## 10. Describe methods used to "pool" PRO data in the meta analysis

□ "Pooling" not possible

#### Give reasons

Г

#### □ Brief description of methods used

Specify:	
Weighted mean difference: Yes No Effect size with between-person SD: Yes No Effect size using mixed between-person SD and within-person SD: Yes Dichotomized outcome with pooling method for binary outcome: Yes Other: Yes No please specify	□ No □ No

11.	What was the relation	nship/association betwee	n TREATMENT(S)	) ASSIGNMENT	& PRO?
(At	tach tables/figures for	each article on this relat	ionship or abstract	them)	

□ Treatment improved quality of life	
--------------------------------------	--

Please specify which treatment and QOL measure:

□ No significant relationship/association

Please specify which treatment and QOL measure:

□ Treatment worsened quality of life Please specify which treatment and QOL measure:

 $\Box$  No mention of relationship/association of treatment assignment and quality of life

12.	Was the magnitude of treatment effect related to magnitude of change in the PRO, such as amount of weight loss
	observed related to the amount of change in the obesity-related QoL measure?

□ Yes □ No

#### 13. If yes, what was the direction of the relationship?

□ greater impro	ovement in QOL	QOL measure:	
□ greater reduc	ction in QOL	QOL measure:	_
□ Not reported		QOL measure:	_
		inical meaningful terms? □Yes □No	
	Minimally important diff	Cerence   Describe:	
	An anchor Describe:		

 Other
 Describe: \_\_\_\_\_\_

Dichotomized outcome with absolute benefit;

Dichotomized outcome with absolute benefit and NNT;

□ Effect size conversions back to natural units;

□ Responder analysis

# 15. Who funded the study? \_\_\_\_\_

Check all that apply:

□ Government □ Industry □ Foundation □ Other □ Not reported
