

2020 Key Outputs

Convenors: Gordon Guyatt and
Holger Schünemann

2020 Highlight:

Advancing methods in assessing the certainty of evidence and developing recommendations, providing support to more than 100 organizations globally linking systematic reviews to decisions

Research and development

- Methods development of the Cochrane GRADEing Methods Group largely takes place within the GRADE Working Group www.gradeworkinggroup.org

Best practice and guidance

- GRADEing continues to make high impact contributions by advancing the assessment of risk of bias and the certainty of evidence in the context of non-randomized studies, network meta-analysis, prognosis and tests, and [informing Cochrane interpretation of effects and certainty](#)
- COVID-19: we utilized GRADE methods [Developing trustworthy recommendations as part of an urgent response \(1-2 weeks\): a GRADE concept paper GRADE Rapid](#)
- Contributed two chapters to the Cochrane Handbook for Interventions: [Chapter 14 - Completing Summary of findings tables and grading the certainty of evidence](#) and [Chapter 15 - Interpreting results and drawing conclusions](#)

Methods implementation

- Work closely with the Methods Executive and support the Central Editorial team in implementing methods related to GRADE and Summary of Findings Tables (SoF)
- Support Cochrane networks with implementing the Summary of Findings tables
- Make GRADE's software GRADEpro available to Cochrane authors and provide technical support
