

2021

Convenors: Gordon Guyatt, Holger Schünemann

## Highlight:

Continuing to develop guidance and concepts that conceptualize the assessment of evidence and using evidence to make transparent and trustworthy healthcare decisions

### Research and development

- Methods development of the Cochrane GRADEing Methods Group largely takes place within the GRADE Working Group [www.gradeworkinggroup.org](http://www.gradeworkinggroup.org)

### Best practice and guidance

- GRADE Guidelines 29: Rating the certainty in time-to-event outcomes-Study limitations due to censoring of participants with missing data in intervention studies
- GRADE Guidelines 30: the GRADE approach to assessing the certainty of modelled evidence-An overview in the context of health decision-making
- GRADE Guidance 31: Assessing the certainty across a body of evidence for comparative test accuracy

### Methods implementation

- Hold bimonthly Summary of Findings Clinics for Cochrane authors that are well attended. Cochrane authors pose questions and challenges, and they are discussed with one of the convenors (H. Schünemann). Recordings available upon request
- Provided feedback on Cochrane's new Editorial Manager system
- GRADEpro is available to Cochrane authors
