

# 2020 Key Outputs

Convenors: Lisa Askie, Jessie Berlin,  
Davina Gherzi

Editors: Saskia Cheyne, Kylie Hunter, Anna  
Lene Seidler

## 2020 Highlight:

Publication in the BMJ of a '[A guide to prospective meta-analysis](#)', which has received international recognition and a top 5% Altmetrics Attention score

### Research and development

- Developed a step-by-step guide to conducting a prospective meta-analysis, which was [published](#) in the Research Methods and Reporting section of the BMJ
- Updated our scoping review to identify the number of PMA in health research, and describe their key features, methods and reporting

### Best practice and guidance

- [Prospective approaches to accumulating evidence](#), Chapter 22 in the Cochrane Handbook
- [Associations between industry involvement and study characteristics at the time of trial registration in biomedical research](#)
- [Interventions commenced by early infancy to prevent childhood obesity - the EPOCH Collaboration: an individual participant data prospective meta-analysis of four randomised controlled trials](#)

### Methods implementation

- The advantages of prospective meta-analyses (PMA) in health research. Awarded Best moderated poster award at the Australian Clinical Trials Alliance (ACTA) International Clinical Trials Conference, 2019
- Prospective Meta-Analysis: An Introduction, delivered by PMA expert Lene Seidler and chaired by Lisa Askie, CTC in Learning lunchtime seminar, June 2020
