

2023

Convenors: Mona Nasser, Edward Wilson, Roberto D'Amico, Moni Choudhury, Sumanth Kambrgere Nagraj, Tarang Sharma, Prashanti Eachempati, Seilin Uhm

Highlight:
Involved in methods development for more inclusive and transparent approaches to set priorities

Research and development

- Develop a [draft framework](#) of evidence-informed health priority setting that supports countries in identifying appropriate steps and methods when developing and implementing national research agenda.
- Working on a series of qualitative studies to understand how to engage individuals from different ethnicities and languages in setting priorities for research.
- Conduct a [mixed-methods analysis](#) on James Lind Alliance on preterm birth priority setting.

Best practice and guidance

- Working on developing and reviewing the Multi-Ethno-Linguistic Tool Kit (MELT) to support research groups in developing inclusive research priority-setting exercises.

Methods implementation

- Consult with the Climate Health Working Group to help them inform their decisions on priority setting.
- Support the Cochrane-Campbell Global Ageing Partnership to develop a [priority-setting exercise](#).
- Organise a [Training Workshop](#) on setting priorities for Cochrane groups in the 2023 Cochrane Colloquium in London.
