

2023

Convenors: Carl Moons, Richard Riley,
Katrina Williams

Coordinator: Anneke Damen

Highlight: The *Cochrane Handbook for Systematic Review of Prognosis Studies* has started! Expected in 2025

Research and development

- Developed guidance for using GRADE in systematic reviews of prognosis studies.
- Developed [TRIPOD-SRMA](#) for reporting systematic reviews of prediction model studies and [TRIPOD-AI](#) for reporting prediction models using artificial intelligence (AI).
- Developing ROBOPS, a risk of bias tool for overall prognosis studies.
- Developing [PROBAST+AI](#) for quality assessment of prediction models developed using regression-based and AI techniques.

Best practice and guidance

- Provided online and face-to-face courses on systematic reviews of prognosis studies for Cochrane authors.
- Published many papers on reporting and methods for primary and meta-prognosis studies.
- Finalized draft *Handbook* chapters about introduction to and planning of a prognosis review, PICOTS formulation, writing a protocol, study selection, summary of findings and grading the evidence.

Methods implementation

- Joined the editorial board of the new journal [Cochrane Evidence Synthesis and Methods](#).
- Available to support and peer review Cochrane Reviews.
